Claim 34 is objected to because of the following informalities: it appears that "if" should be --- in ---. Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-20,22,24,28,29 and 32-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yuen, Krause or Kuemmerlin.

Claims 30 and 34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yoo '950.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoo '950 in view of either Swiderski et al or Purkapile. Yoo shows the claimed hinge and rail assembly with the exception of the reinforcement segment. Swiderski and Purkapile show stems, 32; 50,150, respectively, having reinforcement segments. It would have been obvious to one of ordinary skill in the

art at the time the invention was made to modify the stem portions of Yoo to comprise reinforcement segments, as taught by either Swiderski or Purkapile, to strengthen same.
